Request for Decision Re Payment of Cost of Living Allowances
Payable to Married Employees.

1. The memorandum from the Finance Division raises the question of the acceptability of a State Department interpretation of the Standardized Government Civilian Allowance Regulations in application to our people. It would seem that such interpretation would be perfectly acceptable for our purpose when the basic regulation itself emanates from State.

2. In order that the Finance Division may have guidance in the future on questions of this nature, your concurrence is requested in the acceptance of such interpretations where they are not directly contrary to CIA regulations.

3. In regard to the particular facts presented in this case, the regulations provide that the allowance shall be granted and it appears that this is a vested right of the employee, payment for which should be made effective retroactively.
